Specialists in Gases and Welding Equipment

SINCE 1948

WELD TRAINING SCHEDULE

- MIG I
- MIG II
- TIG I
- TIG II

- Classes enrolling now
- Additional classes may be added upon request
- Private group classes available
- Group discounts
- Please cancel 7 days in advance
- Dates are subject to change

For more information, please contact Justin Roy at 314.236.0562 or justinr@ceekay.com

With small classes and a wealth of knowledge, Cee Kay Supply offers the right training for you. Cee Kay Supply provides one day classes in MIG, TIG, and stick and a half day course in Oxy-Fuel. Courses incorporate in-class and hands-on training.

- Our training classes use NEW equipment from Miller, Lincoln Electric, and Victor, so students can experience the latest in welding technology.
- One day classes start at $275/day. Cee Kay does offer group discounts. MIG and TIG classes are scheduled, as well as available by appointment. Stick and Oxy-Fuel are available through appointment only.
- For more information about training classes please call Justin Roy (314) 236-0562 or find us on the web at www.ceekay.com

Course Name/ Information	Course Time	Course Description
Basic MIG I $275	8 a.m. - 4 p.m.	This course will introduce participants to effective practice techniques on carbon steel plate. • Short circuit, globular, spray and pulse spray transfer modes • Shielding gases/welding wires • Machine setup and minor maintenance • Parameter adjustment
Intermediate MIG II $275	8 a.m. - 4 p.m. PEU Credits	This course is designed to refine practice techniques on carbon steel plate. Weld joints will consist of tee, lap, corner, and butt joints in the flat, horizontal, and vertical positions. • Supplement to our basic MIG course • Must possess understanding of all items listed in basic MIG • Solid wire, gas/gasless flux core wires, and metal core wires demonstrated
Basic TIG I $275	8 a.m. - 4 p.m.	This course will introduce individuals to gas tungsten arc welding. The primary focus is on carbon steel plate, however, aluminum and stainless steel will be demonstrated, too. • Understanding of DCEP, DCEN and AC applications • Proper tungsten selection and preparation techniques • Shielding gas selection • Proper equipment setup procedures
Intermediate TIG II $275	8 a.m. - 4 p.m. PEU Credits	This course is designed to refine practice techniques on carbon steel plate. Weld joints will consist of tee, lap, corner, and butt joints in the flat, horizontal, and vertical positions • Supplement to our basic TIG class • Must possess understanding of all the items listed in basic TIG
Oxy-Fuel (Cutting Procedures) $150	8 a.m. - 12 p.m.	Customized for individual needs, with the following focuses. • Proper handling of compressed gases • Storage requirements • Equipment installation and removal procedures • Difference between acetylene and propylene gases
Stick Welding $275	8 a.m. - 4 p.m.	Seminar is designed to give formal training to individuals so they can effectively practice welding technique on carbon steel plate. This seminar can be customized.
